Average for Similar Schools	82%	81%	83%	85%	6%	5%	7.5

Quality Review Score: Developing (2011-2012)

About Our School

At "New Tech," we offer each of our students a very personalized learning experience and empower them to take ownership of that experience. A caring faculty works as a cohesive team and always in partnership with parents to contribute to each child's success. Small class sizes and a variety of support services for students allow faculty and staff to meet the needs of each learner while pushing them to conquer the challenges of the Common Core State Standards. Our membership in the iZone community enables our teachers to use a variety of technology-based instructional resources that offer students targeted support and challenging learning-extension opportunities. In addition to SMART Technology and individual laptops, each student at New Tech uses an iPad mini throughout their school day to enhance their access to these unique opportunities. While infusing our students' academic experience with technology, New Tech implements an innovative literacy curriculum called Learning Cultures. This curriculum gives the ownership of learning back to the student by giving them the freedom to choose how they acquire certain skills while simultaneously teaching them the responsibility of that freedom through a variety of structures. Learning Cultures transforms the way our students interact with each other, and teaches them highly marketable interpersonal and communication skills. Similar to our academic programs, our enrichment and electives programs empower students to identify and study subjects that interest them. We encourage all who are interested to contact our school to schedule a visit. Come and see what New Tech is all about!
